# SNF GROUP

## RESPONSIBLE PURCHASING POLICY

SNF firmly commits to addressing social and environmental issues and the impacts of its activities in these areas. We seek to be a good corporate citizen and to work towards achieving “Responsible Chemistry”.

We strive to offer our customers sustainable partnerships and know that we can only do so with the support of all stakeholders, particularly our suppliers.

SNF is therefore actively involved in ambitious programs within the framework of the United Nations Global Compact and the Responsible Care Charter.

This commitment is reflected in a host of initiatives, namely with the help of ECOVADIS for the CSR (Corporate Social Responsibility) evaluation of our main suppliers. In addition, we search for innovative and more environmentally friendly solutions to offer our customers bio-based and recycled products in keeping with the ISCC+ certification (International Sustainability Carbon Certification).

To support these initiatives and the Group’s growth, our buyers factor in all of our CSR requirements by selecting, supporting, and evaluating suppliers regarding their compliance with our **Responsible Purchasing Charter and the main social, environmental, and ethical criteria and requirements.**

In strict adherence to these principles and to meet our continuous improvement approach, SNF requires its suppliers and subcontractors to respect, along with their suppliers, at least the principles of the Global Compact and the OECD (Organization for Economic Cooperation and Development), together with SNF’s Responsible Purchasing Charter.

We must act together to ensure that our purchases operate within a virtuous and responsible circle.
